Legacy Virtual Data Rooms

InceLink is superior to virtual data rooms of the past. With a modern, intuitive design, InceLink runs on all major browsers and platforms.

InceLink offers customizable solutions to optimize the workflow of any company.

InceLink offers transparent, upfront pricing with no hidden costs.

InceLink is faster and more responsive than competitors and uses absolutely no plugins.

InceLink's clean, modern interface is compatible with all browsers and devices.

Legacy Virtual Data Rooms

Unintuitive

Virtual data rooms (VDRs) haven't changed much since the 1990's. That means their interfaces haven't been updated to account for mobile access or more intuitive features.

Surprise Pricing

Legacy VDR companies charge per-page uploaded or depending on much storage you use. This leads to unexpected fees and negotiations.

Plugins

Nearly all existing data rooms use insecure plugin technology, such as Flash, Java, .NET, and Silverlight.
